

Accelerating
the development
of geothermal energy
globally

Knowledge, strategy & support

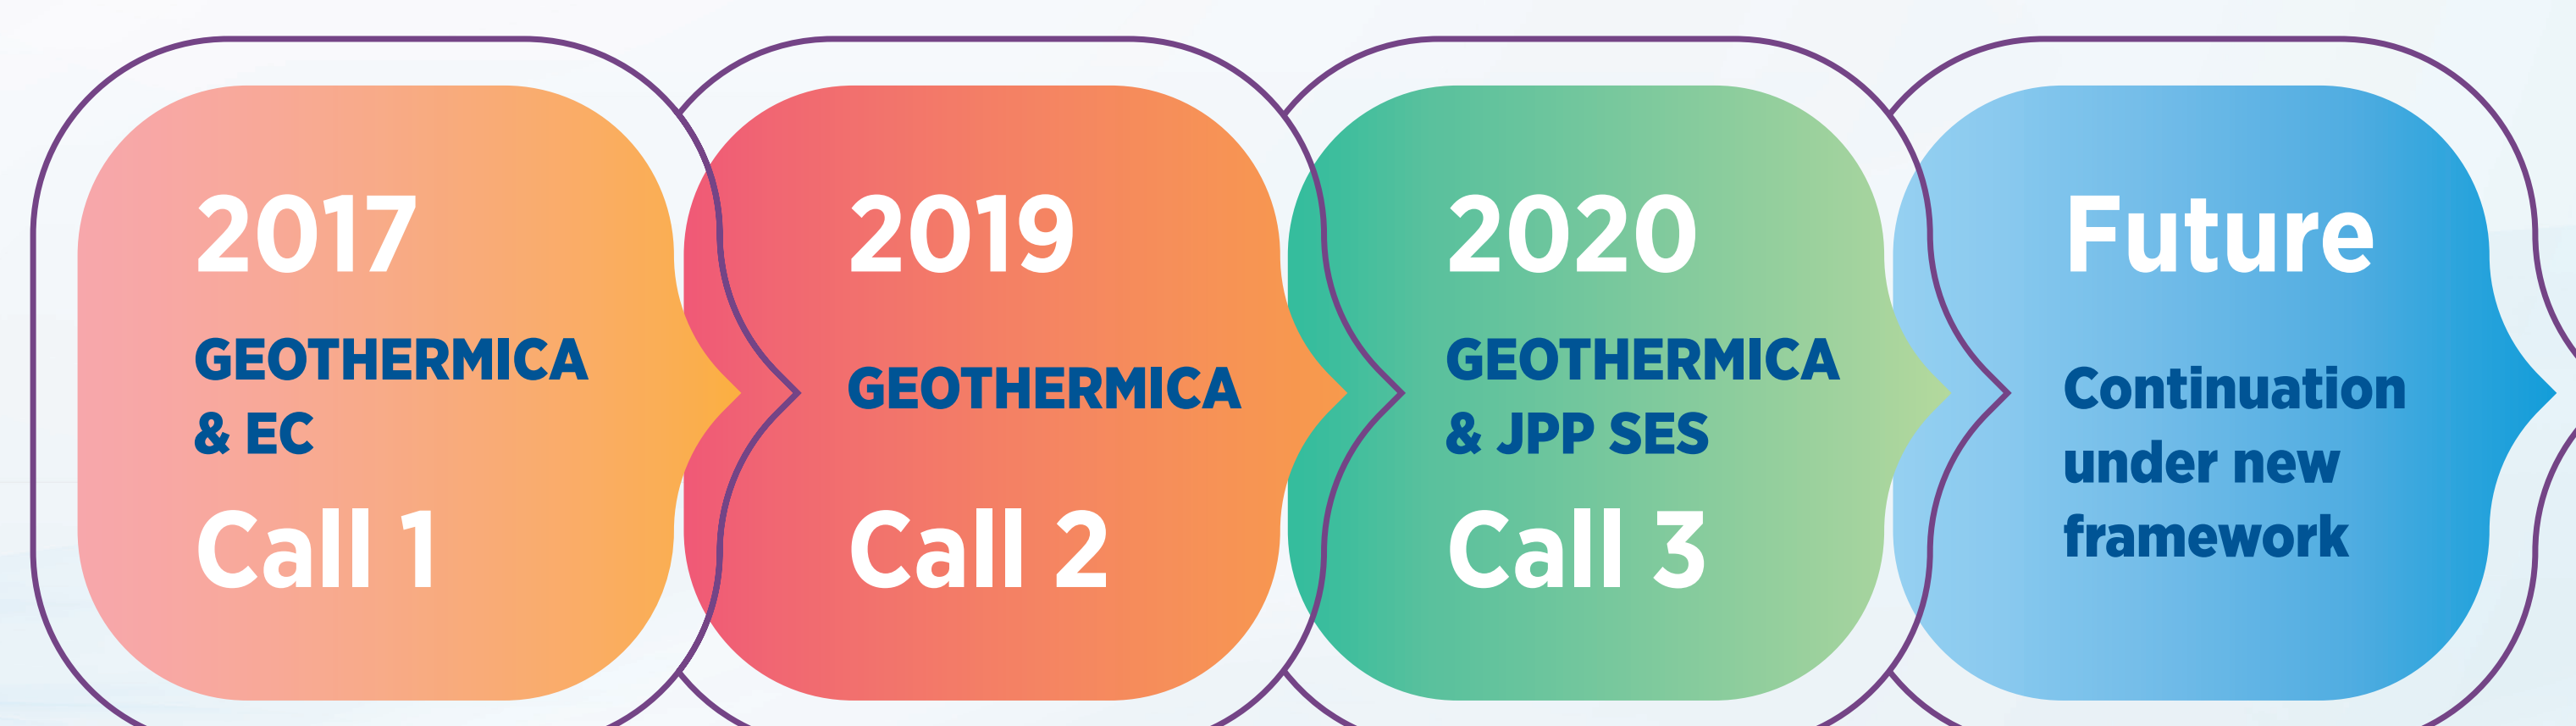

GEO THERMICA is expanding the utilisation of clean and renewable low carbon geothermal energy beyond its traditional markets and regions by providing large scale financing for innovation and technology development projects

Joint Calls

GEO THERMICA ´s joint calls objective is to accelerate the development of geothermal energy globally by pooling financial resources and expertise from twenty-five research and innovation funding organisations, creating a solid global geothermal consortium

Evolution of joint calls

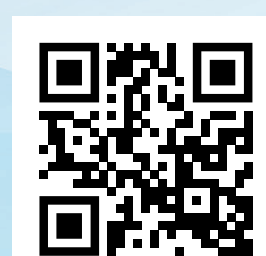

GEO THERMICA towards a stronger geothermal sector

GEO THERMICA has to date, with the support of the EC and twenty-five national and regional organisations, allocated close to M€ 80 and invited the broad geothermal community to apply for funding to explore the optimisation of geothermal utilisation.

Participating countries

GEO THERMICA has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731117
